

7 STATS SHOWCASING THE STATE OF HEALTHCARE BUSINESS OPERATIONS

Less than half of healthcare and life sciences leaders are actually executing or realizing their digital transformation initiatives.

But healthcare providers are leading among those who are acting on transformation, with **20%** fully realizing transformation goals.

57%

57% of consumers prefer to engage through digital channels.

364,571 is the average number of healthcare records breached daily in 2023.

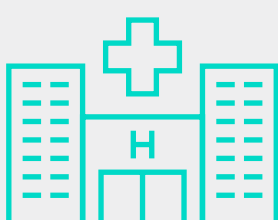

364,571

10 to 30%

Only **10 to 30%** of care plan members feel truly engaged with and involved in their provider care plans.

50%

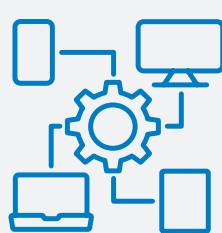

Just over 50% of hospitals with EHRs integrate with health insurer real-time benefit info for all or nearly all payers.

But this does not include non-cute or federal hospital providers, and it is unknown how many hospitals (of any category) integrate their EHRs with a larger patient portal/management system for a more holistic view of patient experience.

Healthcare data will comprise **36%** of all the world's data by 2025 — but **97%** of it is going entirely unused.

36%

79%

79% of healthcare leaders view automation and AI as important priorities for their companies' futures.
